[Chapter 6: Balancing the General Ledger & Preparing a Trial Balance](#)

Foreword

Annelize iLiffe

This book is specifically written for Grade 8 learners and beginners who just started with Accounting as a subject at school. It will also be most beneficial for teachers teaching Economic Management Sciences (EMS) or Accounting and do not have an Accounting background. Running a tutoring business for almost 20 years for both high school pupils and university students, I became increasingly aware of the great need out there for a publication where the basics are explained in a way to build a solid foundation for the child who wants to further his/her career in Accounting/Finance. The book is based on a story of a girl who started a Sweets Business and the underlying Accounting concepts and skills necessary to succeed in this. Grade 9 will be a continuation of Grade 8, and so forth with the basics just getting more complex.

With special thanks to Greg, Jeffrey, Stephan and Samantha who made this possible for me. Without you I could not have done this! Samantha, you have been my greatest inspiration in writing this book, because you were at the age where you could have benefitted the most from it.

Starting your own business

Your Name: The Sweet Lady

The name of your Business: The Sweet Xpress

Logo:

Slogan: Xpress your sweeter side

Definition

Debits & Credits

Every single transaction in Accounting is made up of a debit & credit side. A debit is usually shown on the left and a credit on the right hand side of a column or an account.

Definition

Accounting Cycle

The accounting cycle is the name given to the collective process of recording and processing the accounting events of a company. The series of steps begin when a transaction occurs and end with its inclusion in the financial statements.

Accounting Cycle

1. Accounting Equation

2. Entering transactions in Subsidiary Journals

3. Balancing Subsidiary Journals

4. Posting to General Ledger

5. Balancing General Ledger

6. Preparing a Trial Balance

Accounting Equation

Assets = Liabilities + Owners Equity

Accounting Equation

$$\text{Assets} = \text{Liabilities} + \text{Owners Equity}$$

Definition

Accounting Equation

Assets = liabilities + owners' equity. It expresses the relationship between what is owned and what is owed by an entity.

$$A = L + E$$

The title "Accounting Equation" is written in a large, bold, black font. To its left is a small icon of a person climbing a staircase. A large red heart shape is drawn around the main text of the diagram. At the top of the heart is a green apple. At the bottom of the heart is a green box containing the equation $A = L + E$ and another green apple to its right. A large, light gray watermark "Free Sample" is oriented diagonally across the center of the page.
