# Getting Started Tips

## Be Patient

Keep playing the game as it has so much to offer, including multiple boss fights and you will not be able to master as soon as you get your hands on the game. So keep practicing and the tokens and bananas will start coming too, together with the high scores.

- If you see a large patch of green runway coming up, get ready to take control of your minion using your device's tilt functionality. It's very easy to slip up here, so make very gentle movements - concentrate on surviving rather than grabbing every last banana.
- It's always worth bumping into fellow minions, rather than grabbing the handful of bananas nearby, as this will increase your scoring multiplier. All you have to do to take them out is be in the nearest lane to them - your minion will automatically take care of the rest.
- When fighting against Vector, you have to avoid the large units that he drops onto the lanes, but fire the shielded units back at him. All you have to do to take him down is tap on these explosive objects to send them hurtling towards his ship. Make sure you're out of harm's way before tapping though.
- Don't forget to upgrade your minion via the shop. Most upgrades can be bought using the bananas you've collected, and we recommend prioritizing the Minion Shield first, so you can survive a collision on the course. This is very handy when the pace quickens after the first few minutes.
- Pay attention to the goals that you're given throughout the game. They're not hard to complete, and reward you with a generous chunk of tokens to help you continue on in the game after taking a tumble. Reaching these goals will also open up new environments for you to explore.
- Always prioritize grabbing the Fluffy Unicorn icon when it appears on the screen. You'll need to unlock it from the store first, but once active this mini-game gives you the chance to earn some serious bananas. Use your tilt controls to steer the unicorn through the massive columns of currency.

- Run out of tokens, and getting annoyed of the Revive timer message? Tap rapidly on the screen, anywhere outside of the Revive box, and you'll be able to start up a new game in no time at all. Note that if you do want to Revive, it'll cost more with each successive use in any single run.
- Grab the Fluffy Unicorn icon when it appears on the screen. You will need to unlock it from the store first, but once it is active it gives you the chance to earn some bananas! Use your tilt controls to steer the unicorn.

# Outfits

The different outfits that are available in the game are not there just for fun. Each outfit has its own special powers or features. For example, some will increase your Banana count automatically by a certain percentage when you complete a run wearing that outfit. Other costumes make power ups last longer.

Stock up on outfits you can afford with your tokens as you receive them.

# Launch Pads

If you see anything that looks like a launch pad, a platform or something similar, use it as it usually sends you high up in the air and gives you some bananas.

Minion Rush isn't like other games such as Candy Crush. You have an infinite amount of runs and for the most part, getting a super long run doesn't do anything but boost your top score. You also only need one fruit item to unlock the next level so if you've already got that, don't waste your precious Gru tokens. They are always better spent on costumes, items, and upgrades.

Instead, just start the run over in order to complete it. I can't think of any scenario where you'd need to cash in tokens to continue a run, unless you're really having a hard time. However, with the new Jelly Labs mode of play, most challenges can be completed in shorter runs as long as you choose costumes and upgrades wisely.
