An aerial photograph of a large, multi-lobed lake system, likely a reservoir or a series of connected ponds. The water is a deep blue color. The surrounding land is lush green, with dense forests and open fields. A winding road or path is visible on the left side of the image. The top of the image features a blue banner with white and light blue decorative elements, including stars, swirls, and the word "Earth" in a cursive font.

Summary: "Did you know that most of Earth is covered
with water? Oceans, lakes, and rivers are water bodies
on Earth. Lakes and rivers are fresh water. Oceans are
saltwater. Living things depend on water for survival."
— Provided by publisher.

Audience: K to grade 3.

Includes index.

A Watery Planet

Splash in it. Wash in it. Swim in it. Drink it.
Water is one of the most important things on Earth.

Rainbow trout live
in freshwater.

We can't live without it! So, it's a good thing that water is everywhere. Water covers much more than half of Earth. It's even underground.

Look Out Below!

Almost 70% of Earth's freshwater is found in ice caps and glaciers. The other 30% is found underground.

an underground river
