Answer Key

Introduction

How to Use This Literature Guide

Today's standards demand rigor and relevance in the reading of complex texts. The units in this series guide teachers in a rich and deep exploration of worthwhile works of literature for classroom study. The most rigorous instruction can also be interesting and engaging!

Many current strategies for effective literacy instruction have been incorporated into these instructional guides for literature. Throughout the units, text-dependent questions are used to determine comprehension of the book as well as student interpretation of the vocabulary words. The books chosen for the series are complex exemplars of carefully crafted works of literature. Close reading is used throughout the units to guide students toward revisiting the text and using textual evidence to respond to prompts orally and in writing. Students must analyze the story elements in multiple assignments for each section of the book. All of these strategies work together to rigorously guide students through their study of literature.

The next few pages will make clear how to use this guide for a purposeful and meaningful literature study. Each section of this guide is set up in the same way to make it easier for you to implement the instruction in your classroom.

Theme Thoughts

The great works of literature used throughout this series have important themes that have been relevant to people for many years. Many of the themes will be discussed during the various sections of this instructional guide. However, it would also benefit students to have independent time to think about the key themes of the novel.

Before students begin reading, have them complete *Pre-Reading Theme Thoughts* (page 13). This graphic organizer will allow students to think about the themes outside the context of the story. They'll have the opportunity to evaluate statements based on important themes and defend their opinions. Be sure to have students keep their papers for comparison to the *Post-Reading Theme Thoughts* (page 64). This graphic organizer is similar to the pre-reading activity. However, this time, students will be answering the questions from the point of view of one of the characters in the novel. They have to think about how the character would feel about each statement and defend their thoughts. To conclude the activity, have students compare what they thought about the themes before they read the novel to what the characters discovered during the story.

Vocabulary

Each teacher overview page has definitions and sentences about how key vocabulary words are used in the section. These words should be introduced and discussed with students. There are two student vocabulary activity pages in each section. On the first page, students are asked to define the ten words chosen by the author of this unit. On the

second page in most sections, each student will select at least eight words that he or she finds interesting or difficult. For each section, choose one of these pages for your students to complete. With either assignment, you may want to have students get into pairs to discuss the meanings of the words. Allow students to use reference guides to define the words. Monitor students to make sure the definitions they have found are accurate and relate to how the words are used in the text.

On some of the vocabulary student pages, students are asked to answer text-related questions about the vocabulary words. The following question stems will help you create your own vocabulary questions if you'd like to extend the discussion.

- How does this word describe _____'s character?
- In what ways does this word relate to the problem in this story?
- How does this word help you understand the setting?
- In what ways is this word related to the story's solution?
- Describe how this word supports the novel's theme of
- What visual images does this word bring to your mind?
- For what reasons might the author have chosen to use this particular word?

At times, more work with the words will help students understand their meanings. The following quick vocabulary activities are a good way to further study the words.

- Have students practice their vocabulary and writing skills by creating sentences and/or paragraphs in which multiple vocabulary words are used correctly and with evidence of understanding.
- Students can play vocabulary concentration. Students make a set of cards with the words and a separate set of cards with the definitions. Then, students lay the cards out on the table and play concentration. The goal of the game is to match vocabulary words with their definitions.
- Students can create word journal entries about the words. Students choose words they think are important and then describe why they think each word is important within the novel.

Analyzing the Literature

After students have read each section, hold small-group or whole-class discussions. Questions are written at two levels of complexity to allow you to decide which questions best meet the needs of your students. The Level 1 questions are typically less abstract than the Level 2 questions. Level 1 is indicated by a square, while Level 2 is indicated by a triangle. These questions focus on the various story elements, such as character, setting, and plot. Student pages are provided if you want to assign these questions for individual student work before your group discussion. Be sure to add further questions as your students discuss what they've read. For each question, a few key points are provided for your reference as you discuss the novel with students.
