My Experience with Epilepsy A true life tale of Madhusudhan

About My Family

I am S. Madhusudhan, I belong to Hindu middle class family. I have one younger brother who finished Doctor in homoeopathy. My father Mr. S. Srinivasan retired. State bank employee in Chennai India. My Mother S. Malathy Vanjula, she is a TGT Maths teacher for 9th and 10th at Modern senior secondary school, Nanganallur Chennai India 600061. My Grandfather A. Saranathan, is a retired LIC employee. All my family members believe in god.

About Me

I came into this world on the evening of March 13, 1987, in Chennai, Capital city of Tamil Nadu, India. After 10 years, my brother was born in 1997, which is an unexpectable situation. I worked in various organizations with so much pressure and pleasure. I have a strong idea about Administration, as I worked as administrator for quite a long period.

I am very much interested in music, that too Carnatic music, Ilayaraja melodies. I used to find ragas in cine songs, for quite sometimes I was having fun with Cricket.

School Days

As my mother was a teacher she could support me, till my 12th standard. Till my 7th, my studies are good, I used to get within 10 ranks. There were no complications in my studies as well as in my mind.

Just when you go a year, a flashback of this madhu story starts. When I was born, there was no problem. I was a perfect child with 3 kgs. After a few minutes I became a Blue Baby (Oxygen was curtailed). Therefore immediately I was taken to Egmore Child trust hospital. My Mother was in Mambalam health centre. My Brain got affected and a scare was formed due to Blue Baby.

Doctors Who Treated

After 1 month I was discharged from Egmore Child trust hospital. Here Dr. Gopal gave restrictions to my family members.

As my family is a Hindu Brahmin family, Doctor Gopal knows what the family members will do for the child, when the child comes out of hospital. So he put restrictions.

1. Child should not lie-down in the Paddy.

2. Children should be given only Mother's Milk, or else Aavin milk produced by Tamil Nadu Government.
3. All materials which parents are using should sterilize, as this child has less immune power.

As my mother was a teacher, she joined me in the same school where she worked. I Joined LKG (Lower Kindergarten). All the teachers were affectionate towards me. Some children will cry in school when their parents leave the school, but I control my crying. Like that till 7th standard I enjoyed my school life.

Before Surgery

Starting Point of Barrier to Epileptic

When I was sleeping in an annual day, May month, it was 6 am, I suddenly had my first seizure. No one knows what to do. My Father immediately approached my family Dr. Geetha. She injected some medicine and asked to approach Dr. Pandian, he is a Neuro Physician and Pediatrician. My Father took me to Dr. Pandian and visited him. He saw me and gave me some medicine. I was taking the medicines since 1998. He was the First Dr. to suggest medicine for Epileptic. I was going and approaching Dr. Pandian till 2000 year.

After that, he was not maintaining punctuality. One day we went to his clinic by 1 pm and came by 12 midnight. From that my father got irritated and he was searching for some other Neuro Doctor.
