Task Sheet 12

12a) Caleb bought a bag containing 36 candies. From the bag Caleb picked 12 candies without looking. He got 6 red, 3 blue, 2 green, and 1 orange candy.

If the rest of the candies were the same color combination as the 12 he picked out, how many candies of each of these four colors were in the bag when Caleb bought it?

Red	Blue	Green	Orange
-----	------	-------	--------

Explain Your Answer

Explore With Technology

Caleb's teacher, Mrs. Kendell, decides to raise money for a class trip through the sale of candy. Imagine you are Mrs. Kendell and that you have to place an order for candy on the internet.

Go to a site such as www.metrocandy.com/bulk-candy. Imagine you have \$100.00 to spend. On a separate piece of paper place your imaginary order, listing your selections and the cost. Be sure not to "spend" over \$100.00 (including shipping).

b) Josh is given a taste of Caleb's candy and likes it so much he decides to buy his own. He doesn't have much money so he decides to shop around for the best buy. He visits three stores offering the same kind of candy his friend Caleb bought. He would like to buy at least 50 so he can share with his friends.
