# Ancient Forests

**Forests** have been around for a long time. They were here on Earth before people were. Forests cover huge areas of land. They cross continents, many miles.

Forests may be the most beautiful places on Earth. There is so much to see, smell, and hear there. Trees grow thick and tall. Animals live in the trees and on the ground.

**Tropical rainforests** may be the most beautiful forests of all. This book is about the largest tropical rainforest in the world, the Amazon.

**Kelp beds are like  
underwater forests.**
