# BOOM!

The ground rumbles beneath you.  
You are knocked off your feet.

The ground continues to shake.  
You fear it is an earthquake.  
But then a volcanic **vent** erupts.  
**Fiery** hot ash shoots into the sky.  
You get to your feet and run.

VENT

The ground keeps shaking. Another vent bursts from the ground. You hear more rumbling. Then a third vent erupts.

### ***DEADLY CLOUDS***

Clouds of ash and toxic gases shoot out of volcanoes. They can reach speeds greater than 50 miles (80 kilometers) per hour. Their temperatures can reach more than 1,000 degrees Fahrenheit (538 degrees Celsius)!

A large volcano is shown erupting, with a massive, billowing ash cloud rising from the crater. The sky is a mix of blue and white, suggesting a bright day. The volcano's slopes are dark and rocky, with some ash or snow visible near the top. The overall scene is dramatic and powerful.

## ASH CLOUD

Seconds later, there is a massive explosion. You are thrown to the ground. A cloud of ash rushes outward. Everything in its path is **incinerated**.
