PRICKLY PALS

A hedgehog smells the air with its long, pointy nose. Then a door slams. The surprised critter curls into a **prickly** ball.

Hedgehogs are small, shy **mammals**.
These popular pets are often called hedgies.

Hedgies have furry faces and bellies. Their tails are short and stubby. But hedgies are known for their long **spines**!

The spines usually lie flat against hedgehogs' bodies. But the spines poke out when the animals curl up!

SO MANY SPINES

Hedgehogs have up to 7,000 spines! They feel like the spines on a hairbrush.
