

WOLVES!

They scared Little Red Riding Hood and the three little pigs. And even though they are some of the most feared hunters in the world, they are also very loving, loyal, and playful.

WHAT ARE THEY?

(Hint: turn the
page to find out...)

Answer: WOLVES!

WHAT IS A WOLF?

A wolf is a kind of animal called a **mammal**. Many mammals have hair and feed their babies with milk. (You're a mammal, too!)

red wolf

Ethiopian wolf

gray wolf

Kinds of

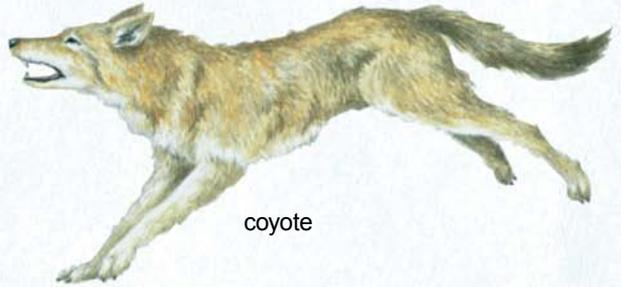

- Gray
- Red
- Ethiopian

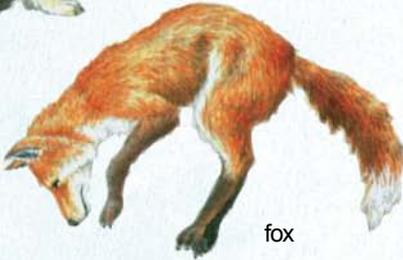

There are three different types of wolves in the world: the gray wolf, the red wolf, and the Ethiopian wolf. Red and Ethiopian wolves are smaller and more slender than gray wolves. And they are more rare.

jackal

coyote

fox

Believe it or not,
wolves are related
to ALL dogs.

Wolves are related to jackals, foxes, coyotes—and dogs! But most wolves are a lot bigger than man's best friend. Wolves can weigh over 100 pounds (45 kg) and be over six feet (2 m) long from their nose to the tip of their tail!

WHAT MAKES A WOLF A WOLF?

Just like dogs, wolves have a tail and four legs. But wolves have legs that are much longer and stronger. They can run over 20 miles (32 km) per hour. And they can run for many hours before getting tired!

What big ears wolves have! They can hear sounds from up to 6 miles (9.5 km) away!

What a big nose a wolf has! It can pick up the scent of an animal from a mile (1.6 km) away!

Body Parts

- Four legs
- Big ears
- Over 40 sharp teeth

**And what
big teeth a
wolf has...**

**the better!
to eat with!**
