“Claude Gets Kidnapped”

CHAPTER 1

MY ZOMBIE

In 2028, earth was decimated by the great zombie invasion when a virus and then contamination struck the earth. The virus started in the Eastern European countries by first striking all military and all law enforcement agencies. With no one to protect the general population the contamination spread quickly and devastated the population. The military and law enforcement agencies in Eastern European countries blamed the virus on a mandatory vaccine that was administered to them by their respective governments. The politicians of the governments blamed the contamination on terrorists. The contamination spread quickly throughout the region and then spread quickly to other continents, Asia, Australia, Africa and even Antarctica. The military and law enforcement agencies in North and South America prevented the contamination from spreading. It did hurt major cities in those continents before it was eradicated. There was only minor damage economically to the Western hemisphere but damage to the rest of the world was devastating.

In 2031, the Panzer Pharmaceutical Company developed an antidote called Erzombie that could tame zombies and not spread contamination to humans. Planet earth had a decision to make to either exterminate or domesticate the zombies. Governments saw the devastation in their countries and pondered what revenue could be generated by taxing zombie sales. The demand for these zombies increased to help in the rebuilding and helped create a new tax revenue for nations.

There are now one billion zombies worldwide. This makeup caused one in ten of the world population to be zombie. Humans must coexist with a whole new species of humans.

The I.Q.'s of these new creatures is minimal which causes problems for the general population. Some are treated like outcasts, some like domesticated pets, while others are very useful to the welfare of societies and families. The government requires all zombies to be implanted with chips to monitor their safety and for taxation.

Zombies need medication to prevent the foul odor they exhibit from the dead flesh present and to prevent this dead flesh from falling off. Humans who were the working class before they were zombified were of great value to human society because they could do simple tasks. The white collar or professional people not so because they could not duplicate the profession that was demanded of them because of their limited I.Q. The former professional people were of little value and were now considered a drain on human society and were protected by the Zombie Protection Agency.

It is now 2028, and because of the demand for some zombies and through taxation things are slowly turning back to normal around the globe. Our whole new society are adjusting to zombies internationally. This brings me to my story of my family consisting of my wife, Tonya and our two daughters, Hannah and Elizabeth and our son, Luke and the newest members of our household Claude, Alice and Eddie. They were once like us until they became zombified and only they know the circumstances of their zombification. We acquired Claude about 3 years ago, while Alice has been in our family for five years. Annoying Eddie has been in our family for only two years. Alice is our maid and sometimes cook who helps my wife immensely.

Claude was my favorite because he was good at helping around the house and was very considerate and pleasing to everyone. Claude could retrieve basic tools and could cut the lawn and water the grass with little supervision, at least what I thought. Claude made a mistake on a beautiful spring day cutting the lawn that would change our lives forever. I was talking with my next door neighbor Larry who was discussing his plan of purchasing two new zombies for himself. Larry is one of my best friends and we have been good neighbors for five years.

Larry is very dramatic and dressed very flamboyantly and some of the neighbors think he is a pimp. Larry says he is a sports agent but cannot tell me any of his clients. He said at one time he had a chance of representing LeBron James but LeBron's family did not like him. Larry is usually on his cell phone by his backyard pool with a drink in his hand.

On this beautiful spring day Claude was cutting the lawn while Larry's zombie Rick, was raking up leaves in Larry's front lawn. In addition, Larry had a zombie named Ted from Z and Z Car Repair fixing the flat tire on Larry's pink convertible Cadillac. The supervisor of Z and Z Car Repair, who should have been monitoring Ted, was in the company vehicle eating his lunch while listening to the car radio. Ted had his legs on my lawn while he was changing the tire. Claude was distracted by a butterfly while cutting the lawn and proceeded to cut Ted's legs with the lawn mower. Then Larry's zombie Rick found some matches and proceeded to burn the leaves he had accumulated near Larry's car. Larry and I are still talking and not aware of what is happening around us. My wife and children come running out of the house screaming at us. When Larry and I realized what was happening we saw Rick and Claude on fire running around the yard and Ted trying to stand up with no legs. Larry was really frantic when he saw his pink Cadillac on fire. I tried to put the fire out on Claude while my wife and children tried to put the fire out on Rick. Larry went straight to his car to try to put the fire out on that. The supervisor was trying to reconnect the legs on Ted.

By the time the paramedic and fire department arrived, Larry's car was a smoldering heap and Claude, Ted and Rick were badly hurt. All three zombie were

put into the ambulance to be escorted to the hospital.

Claude was being placed on the stretcher with the rest of my family crying and hugging Claude. It was my turn to hug Claude, I reached out to shake his hand and his hand and arm were so badly burnt that his arm broke in my hand. My wife and children screamed at the sight and making the situation even worse. Claude could only look at me with pity on his face.
