

A red cable car is shown on a track, moving across a wooden bridge-like structure. In the background, there is a large green field, a city with various buildings, and a body of water under a blue sky with clouds. The title 'The World of Transportation' is written in white on a green rounded rectangle.

# The World of Transportation

# Getting Around on the Ground

For thousands of years, people traveled on foot. They carried their own things. Then people began to tame animals. They put loads on horses. In some countries, camels or elephants carried heavy loads.

In the early 1800s, people put wheels to work. The first bikes had to be pushed. The next bikes had pedals with wooden tires. Riding them was hard work!

## Bicycle History

**1817**

The first bicycle had to be pushed.

**1860s**

The Boneshaker was made of wood.

**1870s**

The High Wheel bike was all metal.

**1888**

Bikes got air-filled tires.
